

EXP-6: ARDUINO TO 16x2 LCD DISPLAY USING PROTEUS

1) Before Running the code:

2) Source Code

```
#include <LiquidCrystal.h>
```

```
LiquidCrystal lcd(7, 8, 9, 10, 11, 12);
```

```
void setup()
```

```
{
```

```
    lcd.begin(16, 2);
```

```
    lcd.print("Hello Arduino");
```

```
}
```

```
void loop()
```

```
{
```

```
    for (int i = 0; i < 13; i++)
```

```
    {
```

```
        lcd.scrollDisplayLeft();
```

```
        delay(700); } 
```

```
}
```

3) After Simulation
