

The screenshot displays the Proteus 8 Professional interface with a schematic capture window. The central component is an Arduino Uno (ARD1), which is connected to a SONAR1 ULTRASONIC SENSOR (RV1) and an LCD display. The sensor is connected to the Arduino's digital pins (VCC to 5V, GND to GND, TRIG to D2, and ECHO to D3). The LCD display is connected to the Arduino's I2C pins (VCC to 5V, GND to GND, SDA to A4, and SCL to A5). The interface includes a top menu bar, a toolbar, a left-hand component list, and a bottom status bar.
